Notice of Oral *Ex Porte* Presentation

October 1, 2002

Ms. Marlene H. Dortch
Secretary
Federal Communications Commission
445 12th Street, S.W.
Washington, DC 20554

Re: In the Matter of Review of the Section **251** Unbundling Obligations of Incumbent Local Exchange Carriers, CC Docket Nu. **01-338**; **Implementation** of the Local Competition Provisions of the Telecommunications Act of **1996**, CC Docket No. **96-98**; Deployment **of** Wireline Services Offering Advanced Telecommunications Capability, CC Docket No. **98-147**; Appropriate Framework for Broadband Access to the Internet over Wireline Facilities, CC Docket No. **02-33**; and Appropriate Regulatory Treatment for Broadband Access to the Internet over Cable Facilities, CS Docket No. 02-52

Dear Ms. Dortch:

On Monday, September 30, 2002, on behalf of the High Tech Broadband Coalition (HTBC), Grant Seiffert, Veronica O'Connell, Derek Khlopov, David Peyton, John Boidock, Peier Pitsch, and the undersigned met with the following members of the Commission's Wireline Competition Bureau:

William F. Maher, Jr.
Richard Lerner
Jessica Rosenworcel
Tom Navin
Brent Olson
Scott Eergmann

In the course of the discussion, the HTBC representatives made several points that are set out in further detail in the HTBC pleadings filed in the above-referenced Commission proceedings involving broadband deployment. Among other things, the HTBC representatives stated:

- The High Tech Broadband Coalition (HTBC) represents the leading trade associations (BSA, CEA, ITI, NAM, SIA, and TIA) of the computer, telecommunications equipment, semiconductor, consumer electronic, software and manufacturing sectors.

List ASCDE _____

- HTBC is unique -- a coalition of trade associations representing over 15,000 companies that participate in the non carrier broadband “value chain.”
- HTBC is committed to the achievement of rapid and ubiquitous deployment of fast interactive, content-rich and affordable broadband services.
- HTBC believes that the best way to reach universal adoption of broadband is strong facilities-based broadband competition among cable modem, wireline broadband (xDSL/fiber), satellite, fixed and wireless alternatives.
- The HTBC believes that the Commission should strive to achieve a minimal regulatory environment that encourages all companies to make the costly and economically risky investments in last mile broadband facilities necessary in order to realize the full benefits of the Internet.
- Specifically, HTBC believes that the Commission should refrain from imposing unbundling obligations on new, last mile broadband facilities, including fiber and DSL and successor electronics deployed on the customer side of the central office.
- On the other hand, competitive entrants should continue to have access to core copper loops and be able to collocate their equipment in ILEC central offices.
- DSL services already face substantial competition from the market-leading cable modem service and emerging satellite and wireless broadband services. The Commission should analyze the broadband market as a whole, rather than DSL services as an individual market.
- Minimizing these unbundling obligations will reward those who take the risk of investing and thereby promote facilities-based competition and deployment.
- A ruling this year on broadband unbundling reform should be the commission’s top priority –meaningful reform would boost not just the telcom service industry but also hardware and software manufacturers.
- The record in this proceeding provides the Commission with the basis and authority to act expeditiously under the precedent of both the *USTA* court decision and the Commission’s own *UNE Remand Order*.
- The “line sharing” portion of the *USTA* decision requires the Commission to consider intermodal competition as it applies the statutory standard for unbundling (that is, the “impair” standard in Section 251). This is the consumer-welfare enhancing standard.
- This approach is consistent with the approach articulated by the Chairman and other Commissioners and set forth in the FCC’s various broadband proceedings.
- The Commission should exercise the preemption authority included in the Act and preclude state commissions from mandating unbundling obligations that exceed those determined by the FCC.
- HTBC endorses the classification of wireline and cable broadband services as “information services” subject only to minimal regulation.
- The FCC should, however, monitor the marketplace for broadband services in order to guard against abuses of a core set of consumer “connectivity principles.”

HTBC

CC Dockets Nos. 01-338, 96-98, 98-147, 02-33, CS Docket No. 02-52
